Democrats: Angelides Leads Westly, 42.9% to 41.3%

Public Library Construction (Proposition 81) Losing 57% to 36.5%

Voluntary Preschool Initiative (Proposition 82) Losing 63.1% to 32.9%

San Diego – A poll released today by Datamar Inc., shows Phil Angelides leading by a small margin, 42.9%, to Steve Westly's 41.3% in the Democratic primary race to be the party nominee, with 15.8% of voters still undecided.

Overall findings are based on a telephone survey of 1,592 *California high-propensity registered voters—voters who voted in the 2002 gubernatorial primary and general elections, the 2003 gubernatorial recall election and the 2004 Presidential primary and general elections*. Sample size is 1,592 respondents and the margin of error is +/- 2.46. The sampling error for subgroups is larger. The Democratic primary race question was available to Democratic voters only. Sample size is 690 respondents and the margin of error is +/- 3.94.

Proposition 81, the California Reading Literacy Improvement and Public Library Construction and Renovation Bond Act is failing 57% to 36.5% with 6.5% undecided.

Proposition 82, the Voluntary Preschool Education Initiative is failing 63.1% to 32.9% with 4% undecided

 May 30 - June 4, 2006

Methodology: Findings are based on a May 30 - June 4, 2006, automated telephone dialer survey of high-propensity registered voters in California using the voice of a professional announcer. A Datamar proprietary algorithm was used to generate random samples of voters for calling. The margin of error for the total sample is +/- 2.46 percent at the 95 percent confidence level. The sampling error for subgroups is larger. Question 13 was available to Democratic voters only. Sample size is 690 respondents and the margin of error is +/- 3.94. Some of the totals may not equal 100 due to rounding.

Registered voters vs. high-propensity voters: Registered voters who *actually vote* are significantly fewer than the voters who are registered to vote. Although it is sometimes useful to determine the opinions of all registered voters (and even the opinions of the general population), surveying the opinions of *the high-propensity voters* is more efficient and predictive for electoral/political purposes.

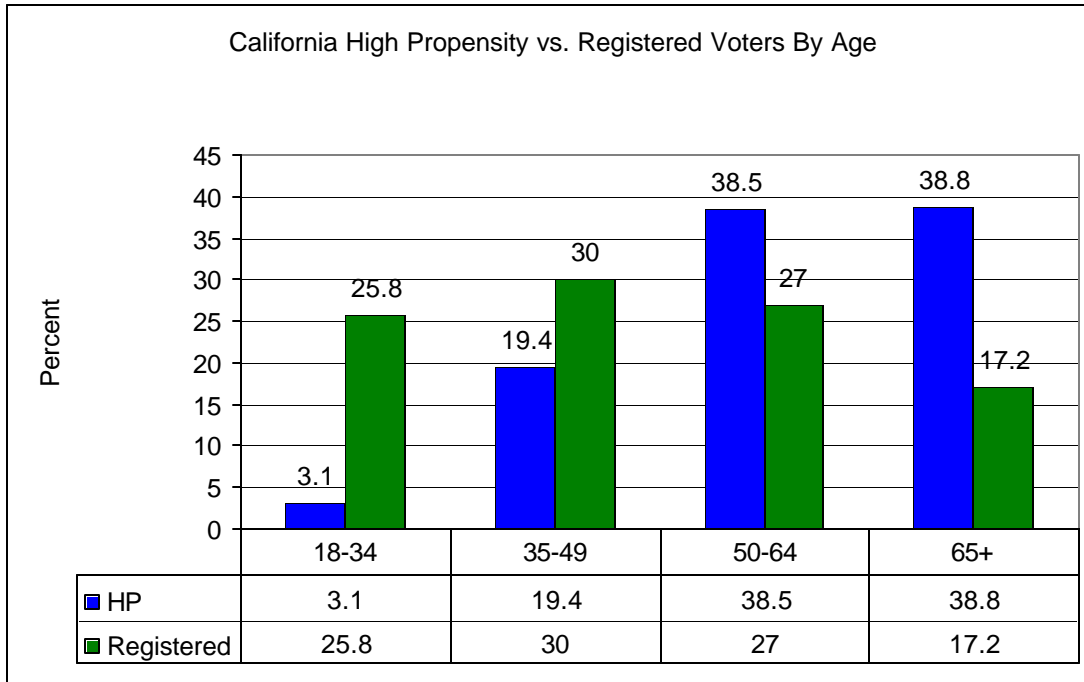

This survey is based on defining “high-propensity” voters as those eligible registered voters who have demonstrated high-propensity by having *actually voted* in one or more recent elections, specifically:

Voters who voted in the 2002 gubernatorial primary and general elections, the 2003 gubernatorial recall election and the 2004 Presidential primary and general elections.

Where necessary, responses were weighted according to age, gender, political party, and geographical area.

We believe that this past-voting-performance-based definition is superior to other predictors -- for example: *registered* Democrats far outnumber *registered* Republicans 42.7% to 34.6%. However, the *high-propensity* voters give a slight edge to Republican (45.9%) vs. Democrat (44.2%) as to turnout . The Nonpartisan and Other voters show similar voting anomalies in that their registered numbers are high but their turnout is much lower, which is why we believe that recent voting history is an accurate predictor of future voting.

Q19. The June 6th primary election will include Proposition 81, the California Reading Literacy Improvement and Public Library Construction and Renovation Bond Act of 2006. This act provides for a bond issue in an amount not to exceed \$600 million to provide funds for the construction and renovation of public library facilities in order to expand access to reading and literacy programs in California’s public education system and to expand access to public library services for all residents of California, and provides state general fund money appropriated to pay off bonds. Fiscal impacts include a state cost of about \$1.2 billion over 30 years to pay off the principal, \$600 million and \$570 million interest cost of the bonds. Payments will be about \$40 million per year. Also, there are one-time local costs, statewide, of about \$320 million to pay for a local share of library facility projects. Also, there are potential additional local operating costs statewide, of several million dollars annually. If the election were held today, would you vote yes or no on Proposition 81?
